PROFESSIONAL SUMMARY

Analytical and product-driven Data Analyst graduating with a **B.Tech in Artificial Intelligence & Data Science** from CARE College of Engineering (CGPA: 7.29/10). Strong hands-on competence in **SQL, PostgreSQL, Python (Pandas, NumPy), Advanced Excel, and Power BI** for data modeling, exploratory data analysis, and decision-support dashboards. Published author in *IJFMR* for developing an automated analytical reporting pipeline that cut reporting turnaround by **70%+**. Proven ability to translate business requirements into working software, having engineered and launched production products including **FC Arena** and **Smart Expense Tracker**.

CORE TECHNICAL SKILLS

Data & BI Analytics:	SQL, PostgreSQL, Power BI, Advanced Excel (XLOOKUP, Pivot Tables, What-If Analysis), Power Query, Relational Database Modeling, KPI Tracking, Data Cleansing, MIS Reporting.
Python & Data Science:	Python, Pandas, NumPy, Exploratory Data Analysis (EDA), Statistical Aggregations, Automated Reporting Pipelines, Anomaly Detection.
Software Engineering:	React, Next.js, Django REST Framework, NestJS, RESTful APIs, Redis, Docker, Git / GitHub, Vercel & Railway Deployment.

PROFESSIONAL EXPERIENCE & INTERNSHIPS

Data Science Intern | Corizo EdTech Pvt Ltd **Aug 2025 – Sep 2025**

- Conducted exploratory data analysis (EDA) across structured academic and business datasets using Python (Pandas, NumPy) to evaluate student engagement patterns.
- Built multi-dimensional Excel reporting templates utilizing dynamic formulas, pivot tables, and conditional logic to support operational decision-making.
- Synthesized analytical findings into structured summary reports, communicating insights and data trends clearly to mentors and stakeholders.

Networking & Systems Intern | Kaashiv InfoTech **Aug 2024 – Sep 2024**

- Configured network topologies, IP addressing schemes, subnet masks, and packet routing protocols in simulated enterprise networking labs.
- Performed connectivity troubleshooting, traffic diagnostics, and technical system documentation to maintain operational continuity.

KEY PROJECTS

FC Arena – Football Esports Tournament Platform [*fcarena.in*] **Next.js • NestJS • PostgreSQL • Redis**

- Engineered and deployed a comprehensive full-stack tournament platform handling team registrations, live fixtures, and tournament brackets.
- Designed automated Round-Robin and Home/Away match scheduling algorithms with strict result validation and anti-duplicate count logic.
- Structured relational database schemas in PostgreSQL using Prisma ORM; actively deployed with 20+ competitive esports players.

Smart Expense Tracker – Personal Finance Application [*Live on Vercel*] **Django REST • React • PostgreSQL • OCR**

- Developed a responsive financial management application with category budgeting, recurring expense rules, and cash-flow analytics.
- Integrated an OCR receipt ingestion pipeline that automatically extracts merchant, date, amount, and GSTIN into verified database records.
- Implemented JWT authentication, email 2FA verification, data backup/restore utilities, and custom CSV financial reporting.

RESEARCH PUBLICATION

Smart Daily Report Automation System Using AI | *IJFMR, Vol. 8, Issue 2, Mar-Apr 2026 (Paper ID: 72819)*

- Authored research demonstrating automated data extraction, cleaning, and aggregation from multi-source databases using Python and Pandas.
- Integrated automated KPI computation, variance tracking, and NLP-driven narrative summaries, reducing manual daily report turnaround by **70%+**.

EDUCATION & PROFESSIONAL TRAINING

B.Tech – Artificial Intelligence & Data Science **2022 – 2026**
CARE College of Engineering, Tamil Nadu **CGPA: 7.29 / 10**

- **Data Analytics Intensive Program:** AccioJob – 6-Month Hands-on Program covering SQL, Python & Power BI (Ongoing)
- **PwC Business Analytics Program:** Industry Simulation, Financial KPIs & Corporate Case Studies (Ongoing)
- **Certifications:** Business Analytics with Excel (Simplilearn) • Data Science Training (Corizo) • Networking (Kaashiv InfoTech)
